## SETTINGS

## Flat

User must create flat after logging in.

1. Go to Settings > Flat Configuration to create flat.
2. Click on the “Create/Re-set Flat” button.

## Flat List

Show 10 entries Search:

Sl.	Wing	Floor	Flat No	Create/Re-set Flat
No data available in table				

Showing 0 to 0 of 0 entries Previous Next

3. Fill up the following information to create flat.

## Create Flat

Wing ☒ <sup>1</sup>

Total Floor  Wing Per Floor  <sup>2</sup>

Flat Per Wing  Wing Style

Start From  Ground Floor Start

Flat Style  Sequence

Delimiter  <sup>3</sup>

<sup>4</sup>

1. Select the wing checker box to create wing.
2. Fill up all the flat details.
3. Select the flat name format.
4. The “Submit” button will create a flat list, the “Back To List” button will not create flat and return to the Flat List page. The “Reset” button will reset the flat details on the page.

4. Flat list is created.

## Flat List

Show  entries Search:

Sl.	Wing	Floor	Flat No	<a href="#">Create/Re-set Flat</a>
1	A	0	1-0-A	
2	B	0	1-0-B	
3	A	1	1-1-A	
4	B	1	1-1-B	
5	A	2	1-2-A	
6	B	2	1-2-B	

Showing 1 to 6 of 6 entries Previous  Next

## Users

After creating the flat list, it is necessary to create users and assign the users different roles.

1. Go to Settings > Users to create users.
2. Click on the “Add New User” button.
3. Fill out all the user information. While creating users, please keep in mind to select the flat no. from the dropdown. Each flat must be assigned to only one user (except “Tenant” and “Flat Owner” role). Which means, each user will be assigned to only one role (except “Tenant” and “Flat Owner” role). As default, since there are 5 roles, e.g. Admin, Committee, Treasurer, Flat Owner, Tenant ; **there must be atleast 5 users assigned to 5 roles at minimum.**
4. Users can “Edit” or “Delete” the credentials.

## General Entry

1. Go to Settings > General Entry to create general entries.
2. Click on the “Create New” button.
3. Create general entry by selecting the options from the dropdown and write down the details under the “Text” box.

## Approval Config Master

1. Go to Settings > Approval Config Master to create approval limit.
2. Click on the  button. The following UI is shown. Admin has to select the flow, which is **Advance, Expense, Claim, Receive**. The **Role, Amount Limit(Min)** and **Amount Limit(Max)** is different for each kind of flow, which is described below. **Do not forget to click on the active checker box to activate the limit.**

Create Approval Limit

Flow	Role	
<input type="text" value="Expenses"/>	<input type="text" value="Select Role"/>	
Amount Limit(Min)	Amount Limit(Max)	Active <input type="checkbox"/>
<input type="text" value="0"/>	<input type="text" value="0"/>	
<input type="button" value="Submit"/>		<input type="button" value="Back to List"/>

3. The approval limit master table will look like this. Admin can “Edit” or “Delete” any approval limit from the list.

## Approval Limit Master Table

Show  entries Search:

Sl.	Flow	Role	Amount Limit(Min)	Amount Limit(Max)	
1	Expenses	Treasurer	0	1000	 
2	Expenses	Committee	1001	10000	 

Showing 1 to 2 of 2 entries Previous 1 Next

There are four types of approval limit flows : advance, expense, claim and receive – which are explained below.

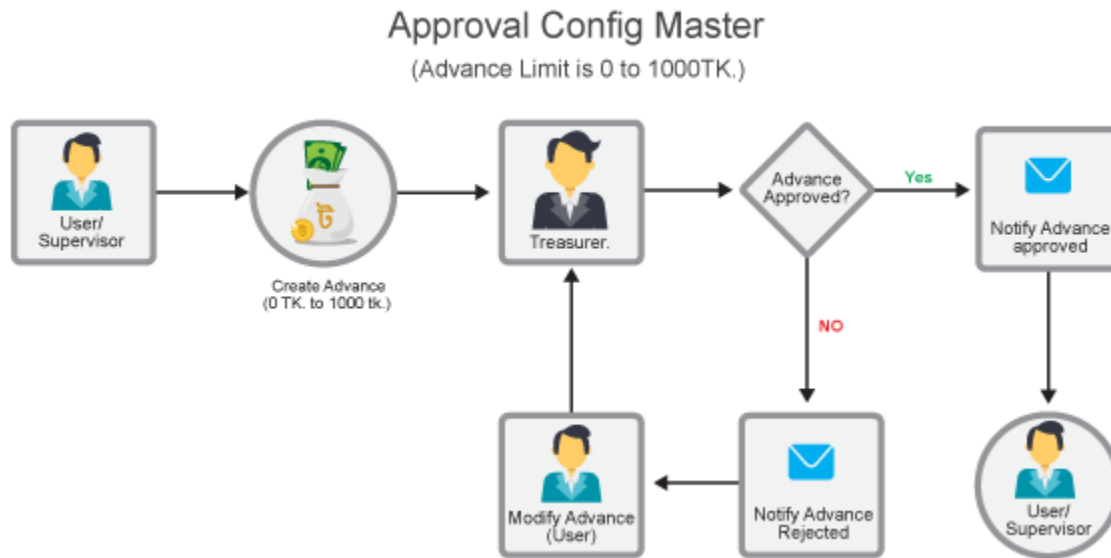

## Advance

Two types of advance approval limits are there :

- 0tk to 1000tk

For 0tk to 1000tk, the **Amount Limit(Min)** is 0tk and **Amount Limit(Max)** is 1000tk. The **Role** for **Amount Limit** 0tk to 1000tk is **treasurer** since it is approved by the treasurer.

The process for the advance flow from amount limit of 0tk to 1000tk is shown below. The user/supervisor creates advance and it goes to the treasurer for approval. If the advance is approved, it is notified to the user/supervisor and if not, the treasurer notifies the user/supervisor that the advance is rejected. The user/supervisor to modifies the advance and sends to the treasurer for approval again.

- 1001tk to 10000tk.

For 1001tk to 10000tk, the **Amount Limit(Min)** is 1001tk and **Amount Limit(Max)** is 10000tk. The **Role** for **Amount Limit** 1001tk to 10000tk is **committee**, since it is approved by the committee.

The process for the advance flow from amount limit of 1001tk to 10000tk is shown below. The user/supervisor creates advance and it goes to the committee for approval. If the advance is approved, it is notified to the treasurer who later notifies to the user/supervisor. If the advance is declined by the committee, it is notified to the user/supervisor for modifying the advance amount. The user/supervisor modifies the advance and sends to the treasurer for approval again.

#### Expense

Two types of expense approval limits are there :

- **0tk to 1000tk**

The process for the expense approval limit under expenses from 0tk to 1000tk is shown below. The user/supervisor creates an expense and it goes to the treasurer for approval. If the expense is approved, it is notified to the user/supervisor and if not, the treasurer notifies the user that the expense is rejected and asks the user/supervisor to modify the amount.

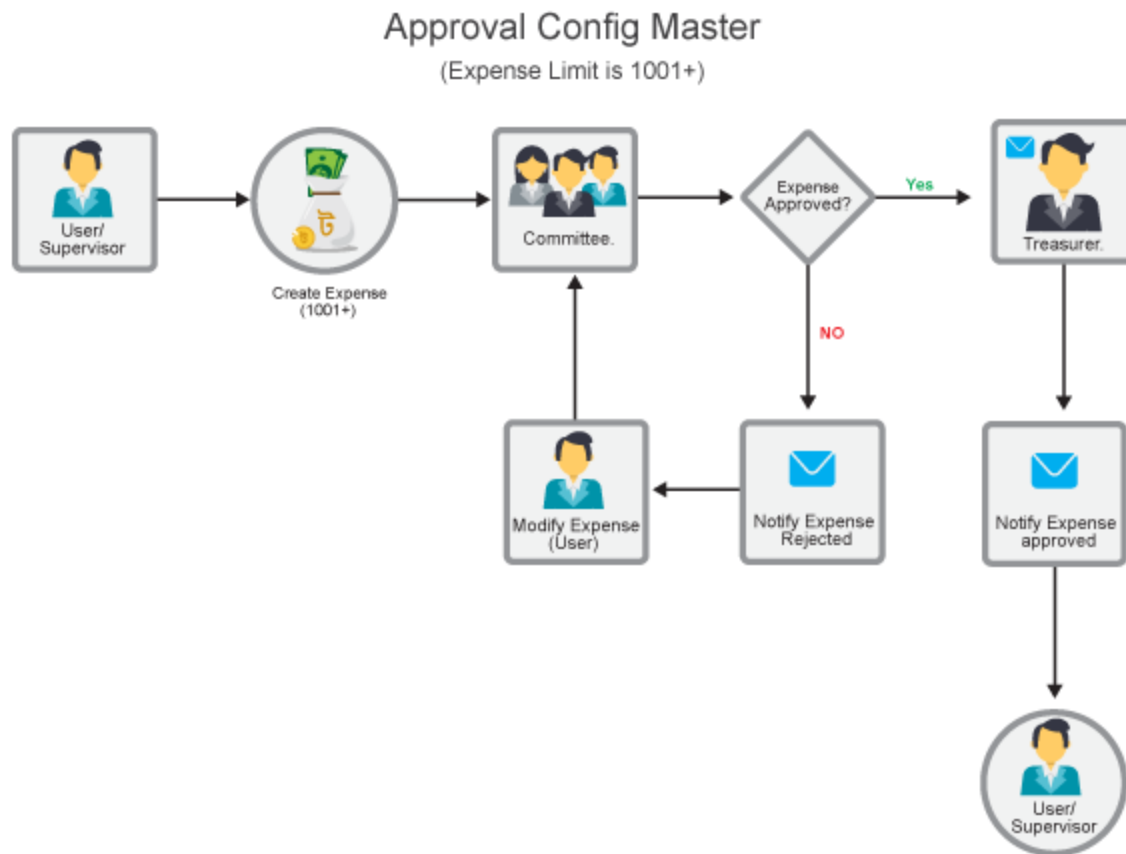

## Approval Config Master

(Expense Limit is 0 to 1000TK.)

- **1001tk to 10000tk**

However, the process for the expense approval limit under expenses from 1001tk to 10000tk is shown below. The user does expense and it goes to the committee for approval. If the expense is approved, it goes to the treasurer who notifies the user about the successful expense approval. If the expense is rejected, the system notifies the committee and asks to modify the expense.

#### Claim

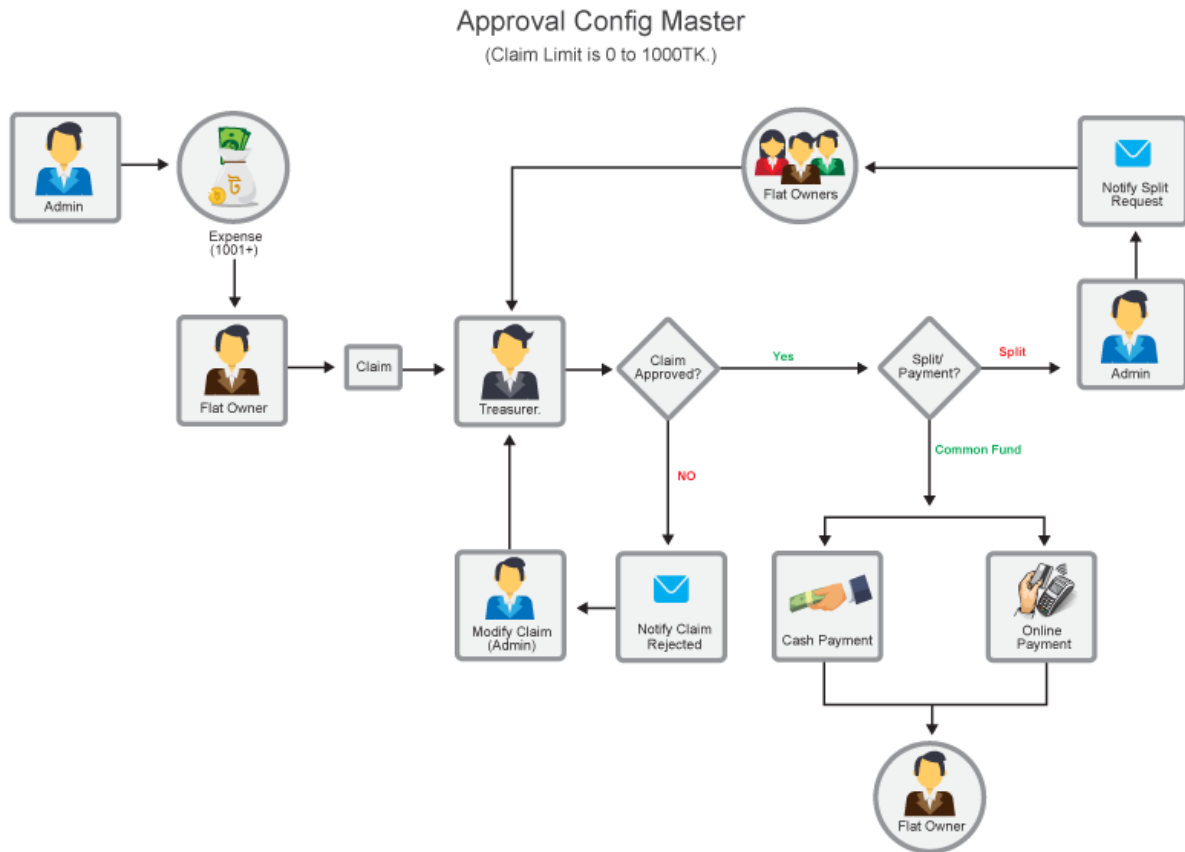

Two types of claim approval limits are there :

- **0tk to 1000tk**

The process for the claiming any amount under approval amount from 0tk to 1000tk is shown below. The admin creates an expense for the flat owner, who later claims to the treasurer. The treasurer has the authority to prove or reject the claimed amount.

If the claimed amount is approved, the claimed amount can be either be split among other flat owners or can be considered as a payment to any flat owner. If the claimed amount is **split**, the admin notifies the flat owners, who later claims the amount from the treasurer through the system. If the claimed amount is **payment**, it goes to the common fund, which the flat owner can collect through cash or online transaccational method.

If the claimed amount is rejected by the treasurer, the admin needs to modify the claimed amount and it goes to the treasurer again for approval.

- **1001tk to 10000tk**

The process for the claiming any amount under approval amount from 1001tk to 10000tk is shown below. The admin creates an expense for the flat owner, who later claims to the committee. The committee has the authority to approve or reject the claimed amount.

If the claimed amount is approved, the treasurer either splits the amount among other flat owners or considers as a payment to any flat owner. If the claimed amount is **split**, the admin notifies the flat owners, who later claims the amount from the treasurer through the system. If the claimed amount is **payment**, it goes to the common fund, which the flat owner can collect through cash or online transactional method.

If the claimed amount is rejected by the committee, the admin needs to modify the claimed amount and it goes to the committee again for approval.
